### New office

A new year and a new office! From the 24th of February Profound will be located in a new office. We are really excited about our new premises that has considerably more workspace, meeting & lecture rooms and a calibration and service laboratory at ground floor level.

A lot of work is currently being done on the renovation of the building. One of the biggest renovations is our spacious lecture room. This gives us the opportunity to give the Profound Academy the attention it deserves. We are able to welcome attendees in our own office. For this year some courses are planned. When the dates are known we will send you more detailed information.

As we will be packing and moving, we advise you not to ship your systems for servicing between the 7th and 21st of February!

Our office will be closed on Friday the 21st of February. On this relocation day we will have limited access to mails and may not be able to respond immediately. We apologise for the inconvenience caused

From the 24th of February the Profound office address will be:

Profound BV  
Mozartlaan 46-A  
NL-2742 BN Waddinxveen  
0031 (0) 182-640 964

Later this year we will plan official events to welcome you at our new office.

All our contact mail addresses remain the same.

### VIBRA-r series

Our followers at LinkedIn already saw a sneak peak from the new VIBRA-r series. Profound will launch a new range of vibration monitoring equipment next to the well-known VIBRA4-series. This series will be optimised for flexible remote monitoring. This series will use high quality MEMS acceleration sensors.

The additional individual products will create modular building blocks which can be used for standard vibration measurement as well as other demanding multi sensor applications. This range also enables integrating the data in extensive geotechnical monitoring projects. The first model will be the VIBRA-r, which will be introduced later this spring.

### Exhibitions

This year Profound or one of our representatives will be present at:

- Grundläggingsdagen 2020 in Stockholm, Sweden
- 36. Baugrundtagung 2020 in Wiesbaden, Germany
- Geotechnical Expo 2020 in Birmingham, UK
- Intergeo in Berlin, Germany
